

PaxeraShare

A complete image sharing platform

A modern approach to image sharing and data access across multi-specialties, that enables healthcare providers to easily and securely send medical images to caregivers and patients, while eliminating the need to burn CD/DVDs.

- Secure delivery of medical images and reports to providers and patients
- Capability to share file formats for all specialties, including non-DICOM files
- Enables viewing of images and reports from any browser or smart device
- HIPAA-compliant solution, and zero footprint leaves no trace on devices
- Works with Paxera solutions or integrates with your current PACS
- Ability to share images easily and securely with a temporary link
- Streamlines image exchange and accelerates turnaround time
- Saves time and money with elimination of CD/DVD burning
- Empowers patients to consolidate dispersed studies and share with caregivers
